

Workshop Breakout Sessions

- Will run concurrently during 3 different time slots over the 2 days
 - Monday at 1:20pm
 - Tuesday at 11:00am
 - Tuesday at 1:45pm
- Are facilitated brainstorming sessions to identify challenges and how cluster activities can address them
- Are repeating- each individual track session repeats; i.e. over the two days you'll want to sit in on 3 different tracks

Here is the location of the six breakout sessions (rooms are adjacent to the main conference hall)

Breakout Room 1. Comprehensive Approach to Port Security

Identifying and understanding interdependencies of port security components with implementation of new technologies.

Breakout Room 2. Sensor fusion

Integrating sensors to provide focused or broad area security capability.

Breakout Room 3. Port and Harbor Emergency Management

Preparedness for and ability to manage disasters that effect port security and business operations.

Breakout Room 4 Workforce Development / Science, Technology, Engineering, and Math

Developing the workforce to fuel technology innovation.

Breakout Room 5. Manned / Unmanned Systems Interoperability

Integrating manned and unmanned sensor capability to improve situational awareness.

Breakout Room 6. Alternative Energy Sources

Energy efficient ideas and products that promote persistent sensor operations.
